

# DESIGNER'S NOTEBOOK 02

*project design from paper to showroom*

*"The thing always happens that you really believe in;  
and the belief in a thing makes it happen"*

*Frank Lloyd Wright*

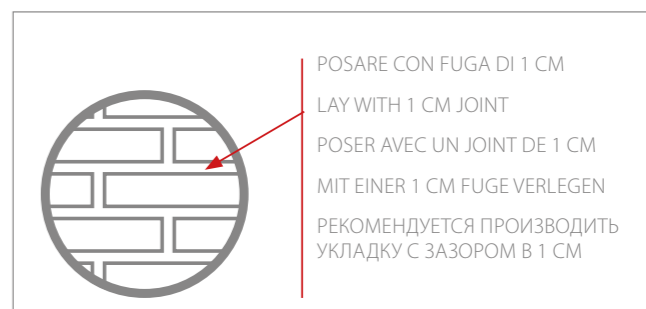

*Wall covering New York Almond 6x25cm*

*In note book 02, the settings are conceived by our architect in a preliminary step using sketches pencilled on paper, and are then digitally produced in a more detailed, more precise fashion. The final phase in this process leads to the creation of a rendering which faithfully reproduces the space that the customer can occupy in its showroom with no particular problems. The goal of this service, which Ceramica Rondine wishes to offer to sales outlets, is to shorten the distance between producer and customer. The settings and spaces shown are subdivided into two chapters called, "Home" and "Business", which are presented in various sizes and with different products. These proposals are only a guide and merely provide a direction. They are in no way intended to be binding...indeed, they are envisioned mainly to act as a starting point for your own creativity. The dimensions of the projects can easily be adapted to any space available in the showroom. Likewise, the product match-ups suggested here are only some of the scores of combinations that are possible between the many products made by Ceramica Rondine. There is no reason why you cannot try other combinations as indicated in our catalogues.*

*LAYING INSTRUCTIONS FOR THE 6x25 FORMAT*
